## About me

Apart from my marketing knowledge based on my current education degree, I possess a strong set of skills on web development and graphic design. This combination gives me more edge on any level of marketing, offline & online. Besides, I am working on my own startup for books & stationeries which has taught me a little bit of each aspect of business development. I believe I can be a better fit in any organisation based on the degree of requirements and responsibilities.

## Education
